ABDHI P PATEL

AI/ML ENGINEER

+91 9019282910 • abdhipatel18@gmail.com • LinkedIn • GitHub: abdhipatel18 • Chamarajanagar, India

PROFILE

Motivated **AI/ML Engineer** with a strong foundation in machine learning, data engineering, and predictive modeling. Experienced in developing and deploying end-to-end intelligent applications, clinical risk scoring engines, and conversational RAG assistants. Proficient in Python, FastAPI, Flask, Scikit-learn, SQL, and modern development workflows. Eager to contribute technical skills, learn emerging AI technologies, and build scalable, data-driven systems in collaborative environments.

TECHNICAL SKILLS

Languages: Python, C, SQL, JavaScript, HTML5/CSS3

AI/ML & Data: Scikit-learn, RAG, NLP, Feature Engineering, Pandas, NumPy

Frameworks & Tools: FastAPI, Flask, Streamlit, Git, Pytest, OpenPyXL

Core Concepts & DBs: Data Structures, DBMS, PostgreSQL, MySQL, OS, Networks

EDUCATION

Bachelor of Engineering in Computer Science | **CGPA: 6.60** — **2023 – 2027**
Sri Jayachamarajendra College of Engineering (SJCE), Mysuru

Pre-University College (PCMC) | **Percentage: 82%** — **2021 – 2023**
St Joseph PU College, Bengaluru

EXPERIENCE & PROJECTS

Machine Learning Intern — MyClinicPulse LLC (Arizona, USA / Remote) — **August 2026**

Project: AI-Based Patient Risk Stratification & Scheduling Prioritization

Tech Stack: Python, Pandas, NumPy, Scikit-learn, FastAPI, PyYAML, OpenPyXL, Streamlit, Pytest

- Developed an AI-driven healthcare decision-support pipeline consolidating multi-source EHR data (demographics, medications, lab results, care gaps) for automated patient risk assessment.
- Implemented a configurable rule-based risk engine using Python and YAML with weighted clinical care-gap parameters to classify patients into High, Medium, Lower, and Already Scheduled tiers.
- Built a scheduling prioritization engine that analyzes clinical risk factors to recommend actionable 1-month, 2-month, or 3-month outreach windows and conflict-free appointment slots.
- Integrated Machine Learning using Scikit-learn for patient risk classification and model evaluation, alongside feature engineering, record matching, and automated data validation.
- Developed an interactive Streamlit dashboard and automated reporting system generating prioritized patient cohorts, care-gap summaries, data-quality reports, and multi-tab Excel/CSV outputs.

AI Personalized Learning System

Tech Stack: Python, Flask, Scikit-learn, NLP, Pandas, Machine Learning

- Developed an AI-Based Personalized Learning System using Machine Learning and Flask to analyze student performance and learning patterns.
- Implemented recommendation systems and predictive models to provide personalized study materials, adaptive learning content, and real-time progress tracking.
- Utilized Python, Scikit-learn, NLP, and data analytics techniques to improve student engagement and academic learning outcomes.

CERTIFICATES

- **AI for Future Workforce** – Intel
- **AI Fluency: Framework and Foundations** – Anthropic
- **Claude 101** – Anthropic
- **Internship Completion Certificate** — AI-Based Patient Risk Stratification and Scheduling Prioritization, MyClinicPulse LLC, Arizona, USA
